

**FIBER-REINFORCED TRAFFIC RATED OVERLAY**

**PRODUCT INFORMATION**

Durável TRO is a heavy-duty traffic-rated cement overlay system which is engineered to restore texture to worn concrete, and to repair spalls and salt damage. The nearly invisible fiber reinforcement in the mix significantly increases flexural strength and tensile strength. Durável TRO will handle all residential and commercial traffic, including forklifts. Durável TRO is installed on parking lots, parking decks, loading docks, driveways, sidewalks, commercial entrances, and other horizontal surfaces. Finish options include smooth trowel, broom texture, and a range of decorative textures. Available in three formulations: Light Gray, Dark Gray, and White. Durável TRO White may be field tinted to over twenty decorative colors. Durável packages overlay and repair mortars in weather-resistant plastic bags to extend product shelf life. Please help take care of the environment and take our empty bags to a recycling center!

**SYSTEM ADVANTAGES**

- ✓ Fiber-Reinforced Strength
- ✓ Extreme Abrasion Resistance
- ✓ Permanent Concrete Repair
- ✓ Resists Freeze-Thaw Cycling
- ✓ Just Add Water, Self Bonding

**PRODUCT FEATURES**

- ✓ Repair Driveways, Parking Lots, Parking Decks, Loading Docks and Ramps
- ✓ Restore Broom Texture to Sidewalks and Entryways
- ✓ Smooth Warehouse Floors
- ✓ Fix Damaged Stairways and Steps

# TRO

## FIBER-REINFORCED TRAFFIC RATED OVERLAY

### CONCRETE REPAIR

Many ice-melt products damage the top surface of concrete resulting in spalls and trip hazards. After years of heavy traffic concrete can become worn and slippery. Heavy impacts can crack the top surface of concrete. Use DuráVEL TRO to permanently repair concrete without the downtime and expense of tearing out the entire slab.

### RESIDENTIAL

DuráVEL TRO will repair damaged driveways and provide an even color from curb to garage. Resurfacing with DuráVEL TRO avoids damage caused by tearing out and replacing a driveway or sidewalk. Established landscape, grass, lighting, invisible fences, irrigation systems, and adjacent surfaces can be protected easily.

### COMMERCIAL

Engineered for a premium blend of fiber-reinforced strengths and abrasion resistance. DuráVEL TRO is strong enough to handle forklifts and other heavy traffic. Eliminate trip-fall hazards on sidewalks and entryways. Fill worn concrete to restore smooth concrete floors in warehouses and stockrooms.
